Experience

Mid-Level Full-Stack Developer, Keeper – São Paulo, SP, Brazil June 2026 – present

- Work on a fintech platform for graduation fundraising and financial management.

Full-Stack Developer, MindGroup Consulting e Marketing – Sorocaba, SP, Brazil Feb 2025 – May 2026

- Architected and shipped 3 production systems using a modular monolith, NestJS, DDD, Next.js, Docker, and CI/CD.
- Designed REST APIs with JWT authentication and granular role-based access control.
- Automated bulk imports, bank transaction processing, and invoice generation, eliminating more than 40 hours of manual work per month.
- Reduced a critical query from 5 s to 240 ms, a 95% improvement, using MySQL views, composite indexes, and cursor pagination.
- Built Next.js frontends averaging 250 ms page loads and maintained 2 React Native/Expo apps with Stripe and eRede/Pix.

Co-Founder & Software Engineer, FazzLeads – Remote June 2024 – present

- Co-founded a platform for real estate agencies and independent brokers, now with 6 paying clients and hundreds of leads a month in the system.
- Put into production an AI agent with Mastra AI, MCP, and GoHighLevel that answers and qualifies leads over WhatsApp and recommends listings, in an operation where leads previously went unanswered.
- Consolidated into the platform what each client used to pay for as separate SaaS tools: property catalog, campaign tracking, site hosting, and an automation builder.
- Architected the backends with DDD and CQRS in NestJS, with production SEO, CI/CD, and observability.

Education

SENAI Sorocaba, Associate Degree in Systems Analysis and Development – Sorocaba, SP, Brazil Jan 2025 – present

SENAI Sorocaba, Technical Degree in Systems Development – Sorocaba, SP, Brazil Jan 2023 – Dec 2024

Professional Certificates

Supervised Machine Learning: Regression and Classification – DeepLearning.AI Jan 2026
Credential ID: L2MYYHXMHCPD

Technical Skills

Languages: TypeScript, Python, Go, Rust, Java

Frontend and Mobile: React, Next.js, Tailwind CSS, React Native, Expo

Backend and Data: Node.js, NestJS, Flask, PostgreSQL, MySQL, Prisma, SQLAlchemy, Redis

Cloud and Infrastructure: AWS, Docker, RabbitMQ, Linux, Grafana, Prometheus, CI/CD

Architecture and Quality: DDD, CQRS, microservices, Saga, Inbox/Outbox, unit, integration, and E2E testing
